HYPOTHESIS · OWNER: DRAGOS POP

Because a CV is just a hypothesis about a person… I believe the insights here will convince you.

PRIMARY METRIC

A conversation that turns into a hire, if we both see the fit.

SECONDARY METRIC

We get to know each other, and see where we could help each other.

PREVIOUS DATA

+15.5%

vendor conversion on a Capterra mobile redesign test, at 95% significance

Reported by David Medlin

41% → <10%

defect ratio in AI-generated content at G2, and generation time from 10+ to under 3 minutes

Reported by Praveen Maloo

1% → ~50%

of landing-page traffic in testing at Gartner Digital Markets, 3-4 tests in parallel

Reported by me

EVIDENCE

FROM MY MANAGER

"He has the structure and technical rigor of a scientist. He set the standard for experimentation best practices, and at peak he ran six experiments at once. He turned data into action and shipped the winners. … Any team would be lucky to have him."

David Medlin · Director of Product Management, Gartner Digital Markets · my manager, 2024–2026

"What set him apart was his exceptional ability to blend data-driven decision making with keen user insights."

Paul Griffiths
Managing VP of Product, Gartner · senior to me, 2022–2024

"He went beyond the spec, learning the codebase and shipping production PRs himself. He worked to drop the error rate to less than 10%."

Praveen Maloo
Founder, NextCorner · my manager at G2, 2026

"…a rare talent for translating complex data and test results into clear, actionable insights that resonate with everyone from peers to the C-suite."

Horacio Saenz III
Performance Marketing Manager, Gartner · colleague, 2022–2025

"Dragos is a highly skilled CRO specialist and brings high value to any product team."

Santiago Murillo
Director of Product, Gartner · my manager, 2023

"…building key client relationships and delivering best in class A/B testing programs and UX Projects."

Kirsty McLellan
Optimisation & UX Partner, dentsu · my manager, 2018–2020

"He had a drive and hunger that is rare to find… His true talent lies in building relationships with stakeholders."

Chris Hodgkinson-Todd
Senior to me at DDL, 2018–2020

SUMMARY

Senior Product Manager with 10+ years in digital growth, five of them in product. Data-driven, with a track record of turning experimentation into revenue and engagement growth. I build experimentation systems and teach teams how to use them. At Gartner Digital Markets I owned the conversion and monetization funnels across Capterra, Software Advice and GetApp (B2B software marketplaces, 2.5M monthly sessions) and took testing velocity up 3-4x. At G2 I took Content Studio from a 10-partner beta to a self-serve GenAI product. I'm good at finding where the revenue gaps are, getting stakeholders to test more, and finding another way to do it instead of copying the competition.

I learned the craft at iProspect (Dentsu) in Manchester, after starting out selling encyclopedias door to door, which taught me a lot about stakeholder management.

EXPERIENCE

Feb – Oct 2026
Barcelona

G2 · Senior Product Manager, Content Studio

- Took over product and go-to-market for Content Studio and moved it from a 10-partner closed beta to a self-serve platform, with a 119% lift in weekly active users in the first quarter.
- Ran vendor interviews that led to the pivot from static assets to self-serve, prompt-driven generation. Shipped it, plus multi-level editing and regeneration for copy and aspect ratios on social platforms.
- Started and championed the quality effort when it wasn't a team priority: a golden set and evaluation rubrics built with engineering. With the model change, generation time went from 10+ minutes to under 3 and defects from 41% to under 10%.
- Led the evaluation and migration across leading image-generation models. Managed the technical relationship with OpenAI (twice-weekly syncs) and learned the codebase well enough to ship production changes through code review.
- Set up funnel event tracking and behavioral cohorts in Amplitude with analytics. Presented bi-weekly to the Co-Founder, SVP of Product and GM of AI.

Mar 2022 – Feb 2026
Barcelona

Gartner Digital Markets · Senior CRO Product Manager

CRO Product Manager 2022–2024, Senior from 2024

- Owned the conversion roadmap and monetization funnels (pay-per-click and pay-per-lead) across Capterra, Software Advice and GetApp. A single experiment lifted vendor conversion rate by up to 15.5%.
- Joined a risk-averse culture that tested on about 1% of traffic on the largest landing page, one test at a time (about six weeks each). Built trust with leadership and took it to about 50%, running 3-4 tests in parallel.
- Took testing capacity up 3-4x by rewriting the experimentation methodology, building prioritization logic that makes trade-offs explicit and adding a structured risk matrix.
- Presented weekly to the Managing VP and VP of Growth, with the directors of analytics, marketing and UX, team leaders and performance managers in the room.
- Created the team's first experiment QA framework (pre-flight checks, 1-hour post-launch verification, 24-hour regression reviews). Multiple product teams used it to catch breaking tests early, saving time and money.
- Wrote the tool comparison report that drove Gartner's global move to a new A/B testing tool, in weeks instead of months. Taught peers statistics, risk and experiment design, and presented to executive leadership, including the Gartner CMO.
- Led cross-functional delivery across engineering, UX, analytics and executives without direct reports.

Jan 2021 – Mar 2022
Barcelona

Festo · Conversion and UX Optimization

- Owned the global experimentation roadmap, vendor tool stack and UX optimization strategy for Festo's international digital sales platform.
- Got executive budget approved, then ran evaluation, procurement and onboarding of Hotjar and Kameleoon and rolled testing out across several countries.
- Ran product discovery and built a long-term optimization backlog. Made A/B testing the mandatory validation step before any engineering time was allocated.

Oct 2018 – Dec 2020
Manchester

iProspect (Dentsu) · Optimisation Executive

- Ran optimization and UX strategy for 7+ enterprise clients and 20+ websites across insurance, automotive leasing and e-commerce, in a fast-paced agency.
- Designed tests that delivered millions of pounds in incremental value, including wins of 10-15% incremental revenue. Funnel changes generated 3,000+ net new leads in 8 months and a 40% lift in checkout completion. Caught live site errors that would have cost hundreds of thousands of pounds.

2014 – 2018
Bucharest

Earlier career

Growth, partnership and sales roles at WebDigital, Omniconvert and others. Signed 50+ clients at WebDigital and co-founded Blue Alliance, a network of digital agencies across several markets.

SKILLS, EDUCATION AND TOOLS

Core skills — Experimentation and A/B testing, experiment QA and prioritization, growth and monetization, funnel analysis, product strategy and roadmaps, GenAI product (model evaluation, vendor management), stakeholder management, data-driven product decisions, product discovery, success metrics, retention, marketplace growth, executive communication, B2B SaaS.

Tools — LaunchDarkly, Optimizely, Kameleoon, Amplitude, GA4, FullStory, Hotjar, SessionCam, ContentSquare, BrowserStack, Power BI, Jira, Confluence, Productboard, Coda, Claude.

Certifications — Baymard Institute E-commerce UX Certification · IBM Enterprise Design Thinking Practitioner · Marketing Analytics: Setting and Measuring KPIs · Marketing: Conversion Rate Optimization.

Education, languages — BA in Journalism, University of Hyperion Bucharest (2009–2012) · English and Romanian (native), Spanish (basic).
